Event Management Summary

A source-transparent register of event records persisted by the operational SQLite store.

Generated 2026-10-20T20:22:03.731Z

Verified project metrics

SAVED EVENTS	DATA STORE	EVENT ROWS
2	SQLite	2

Persisted event register

Event type	Date	Location	Guests	Budget
Birthday	2026-11-20	Abington, PA	100	LKR 2,000,000
Corporate	2026-11-25	Aston, PA	50	LKR 1,000,000

Persistence note

These records are loaded from the existing validated event API and SQLite database. The report does not imply bookings, vendor confirmation or user authentication.

Research limitations and interpretation

This report is generated from the existing PlanoVision project data. Synthetic service options are simulation inputs, not verified real-world offers or availability. Vendor risk fields are research-derived and do not confirm reliability, booking status or collaboration. Model metrics use rule-derived labels and do not establish independent real-world validation. This academic administration workspace has no authentication or role-based access control.
